Leerderaktiwiteitsboek

Learner Activity Book

Afrikaans | English

Die ontwikkeling van hierdie werkboek is met die medewerking van die *Bala Wande-Magic Classroom Collective*-span moontlik gemaak, in oorleg met 'n verwysingspan wat saamgestel is uit individue van etlike universiteite, wiskunde-NRO's en die Departement van Basiese Onderwys.

Hierdie materiaal is gebaseer op die werk van die DBE-werkboeke en bestaande iterasies van lesplanne (GPLMS, Jika iMfundu, NECT en TMU).

Die Bala Wande-bokse met manipuleerbare items is in oorleg met Jade Education ontwerp. Dié bokse voorsien hoëgehalte-materiaal wat 'n integrerende deel van die onderrig-en-leerprogram uitmaak.

The development of this workbook was carried out by the collaborative *Bala Wande-Magic Classroom Collective* team in consultation with a reference team made up of individuals from several universities, mathematics NGOs and the Department of Basic Education. These materials draw on the DBE workbooks and existing iterations of lesson plans (GPLMS, Jika iMfundu, NECT and TMU). The Bala Wande manipulative boxes were designed in consultation with Jade Education. The boxes provide high quality materials which are an integral part of the teaching and learning programme.

Die gebruik van die Bala Wande-leerdearktiwiteitsboek

In hierdie Leerderaktiwiteitsboek is aktiwiteite vervat wat vir 50 dae van onderrig in kwartaal 1 beplan is. Daar is konsepontwikkeling-aktiwiteite, individuele leerdersaktiwiteite en speletjies wat die leerders in pare en in groepe kan speel. Die oplossings vir die aktiwiteite kan in hierdie boek ingeskryf word.

Die materiaal word in 'n tweetalige formaat aangebied. Ons hoop dat die aanbieding van die aktiwiteite in twee tale die leerders sal help om vertroud te raak met wiskundewoorde in hul huistaal asook in Engels. Dit behoort hulle vir die lewenslange leer van wiskunde toe te rus.

As die leerders elke dag en elke kwartaal stelselmatig deur hierdie werkboek-aktiwiteite werk, sal hulle die hele wiskundekurrikulum vir die jaar dek. Ons hoop dat hierdie aktiwiteite 'n prettige manier bied om hulle te help om grondslagkennis van wiskunde op te doen.

Die aanvang van elke nuwe dag word met 'n pers banier aangedui.

Onder die banier is daar 'n vloeidiagram wat die opeenvolging van aktiwiteite vir die dag opsom.

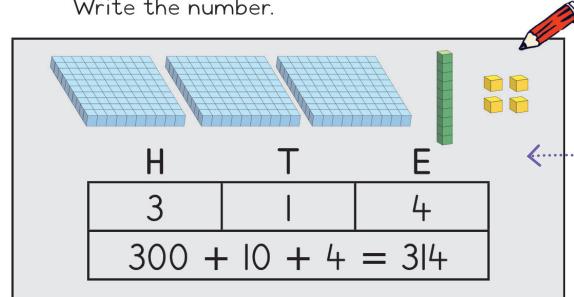

Hoofrekene is die eerste aktiwiteit van elke dag. Die onderwyser begelei die leerders deur hierdie aktiwiteit.

Al die ander bladsye in die boek is vir die leerders wat selfstandig of in groepe, met die onderwyser se begeleiding en ondersteuning, daaraan moet werk. Dit kan die vorm van werkkaarte of speletjies aanneem om die begrippe wat op daardie dag behandel is, vas te lê. Speletjies word met behulp van tekenprente van leerders aangebied om te wys hoe die speletjie gespeel moet word.

2 Skryf die getal neer.

Write the number.

Alle instruksies en inligting word in Afrikaans gegee, met die Engelse vertaling daar onder.

Die leerderswerkkaarte bevat 'n uitgewerkte voorbeeld (deur die grys agtergrond en die rooi potlood aangedui).

Dag 5 van elke week word vir vaslegging en assessering beplan.

Using the Bala Wande Learner Activity Book

This Learner Activity Book has activities planned for 50 days of teaching in Term 1. There are concept development activities, individual learner activities and games for learners to play in pairs and groups. Answers to the activities can be written in this book.

The material is presented using a bilingual format. We hope that presenting the activities in two languages will help learners to become familiar with maths words in both their home language and in English. This will equip them for lifelong learning of maths.

If learners work systematically through these workbook-style activities every day and every term, they will cover the whole maths curriculum for the year. We hope that these activities will be a fun way to help them acquire foundational maths knowledge.

The start of each new day is shown with a purple banner.

Underneath the banner is a flow diagram that summarises the sequence of activities for the day.

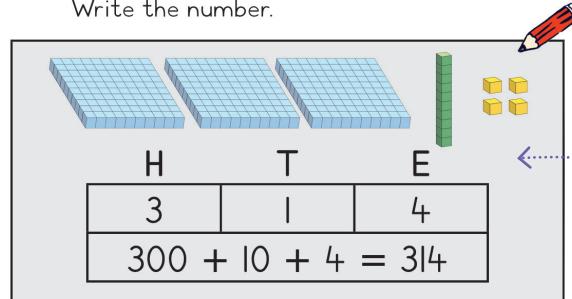

Mental Maths is the first activity every day. The teacher will lead this activity.

All the other pages in the book are for learners to work on independently or in groups with guidance and support from the teacher. They may be worksheets or games, for consolidation of the concepts covered that day. Games are presented using cartoons of learners to show how the game should be played.

2 Skryf die getal neer.

Write the number.

All instructions and information are given in Afrikaans with an English translation below.

Learner worksheets have a worked example (indicated by the grey background and the red pencil).

Day 5 of each week is planned for consolidation and assessment.

WERKKAART
WORKSHEET

WERKKAART
WORKSHEET

Kom ons praat Wiskunde!

Let's talk Maths!

In Afrikaans sê ons:

100'e, 10'e en 1'e

plekwaarde

10 is tien 1'e.

100 is tien 10'e.

295 is twee 100'e, nege 10'e en vyf 1'e.

Veelvoude van 10 is 10, 20, 30, ...

In English we say:

100s, 10s and 1s

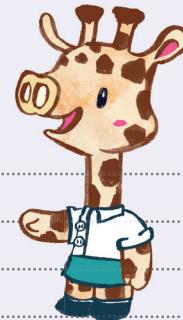

place value

10 is ten 1s.

100 is ten 10s.

295 is two 100s, nine 10s and five 1s.

Multiples of 10 are 10, 20, 30 ...

1 Wys met basis 10-blokkies en spreikaarte.

Show with base 10-blocks and flard cards.

133	331	313	205
250	400	490	409

Kyk mooi na die plekwaarde van elke syfer in die getal. Maak seker jy sit die korrekte hoeveelheid 100'e, 10'e en 1'e neer. Werk saam in pare!

Look carefully at the place value of each digit in the number. Make sure you put out the correct number of 100s, 10s and 1s. Work in pairs!

2 Hutsmerk-10'e!

Work in pairs. Build the number using your blocks.

- Wat is die getal?**

What number?

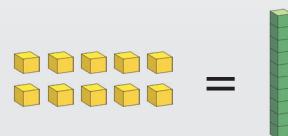

- Hoeveel 100'e is daar?
Hoeveel 10'e? Hoeveel 1'e?

How many 100s? How many 10s? How many 1s?

Werk altyd die som in jou kop uit as jy kan. Gebruik blokkies as jy moet.
Onthou, tien 1's maak een 10.

Always work in your head if you can. Use blocks if you need to.
Remember ten 1s make one 10.

I Tel op deur die 1's saam te groepeer.

Add by grouping the 1s.

$34 + 6 = \underline{40}$	$44 + 6 = \underline{\quad}$	$29 + 1 = \underline{\quad}$
$37 + 3 = \underline{\quad}$	$36 + 4 = \underline{\quad}$	$39 + 1 = \underline{\quad}$
$47 + 3 = \underline{\quad}$	$26 + 4 = \underline{\quad}$	$42 + 8 = \underline{\quad}$

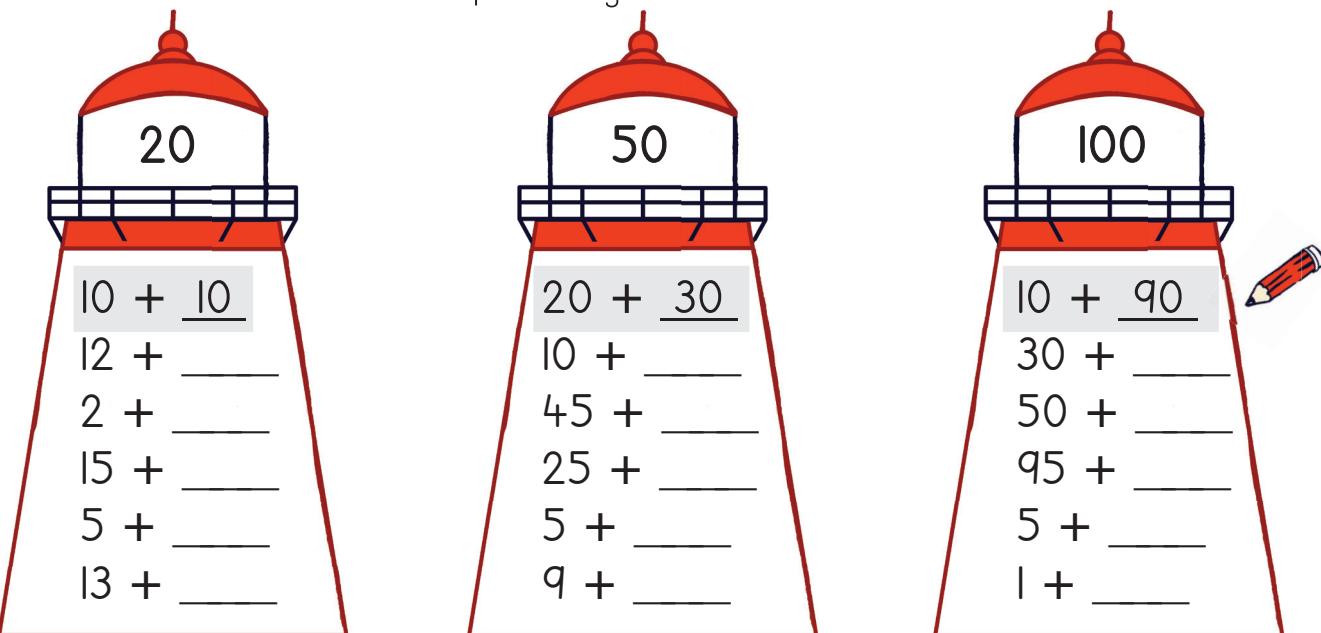

2 Tel op.

Add.

$37 + 3 = \underline{40}$	$46 + 4 = \underline{\quad}$	$41 + 9 = \underline{\quad}$
$71 + 9 = \underline{\quad}$	$21 + 9 = \underline{\quad}$	$37 + 3 = \underline{\quad}$
$82 + 8 = \underline{\quad}$	$74 + 6 = \underline{\quad}$	$28 + 2 = \underline{\quad}$
$55 + 5 = \underline{\quad}$	$38 + 2 = \underline{\quad}$	$65 + 5 = \underline{\quad}$
$63 + 7 = \underline{\quad}$	$57 + 3 = \underline{\quad}$	$84 + 6 = \underline{\quad}$

3 Tel op om die getal bo-aan die vuurtoring te maak.

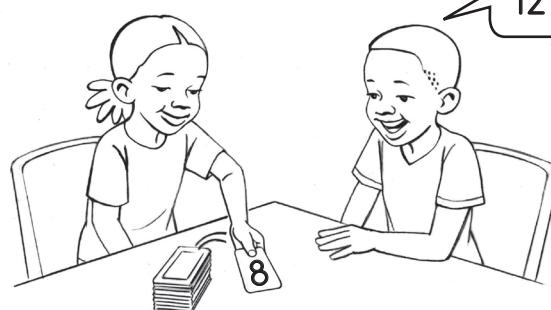

Add to make the number at the top of the lighthouse.

Speletjie: Vinnige wiskunde met kaarte - tel op

Game: Fast maths with cards – add

- Sit getalkaarte 0 tot 10 op 'n hopie neer.
Place number cards 0 to 10 in a pile.
- Draai een kaart om.
Flip one card.
- Hoeveel is nodig om 20 te maak?
How much to make 20?
- Werk vinnig! Maak 30, 40, 50, 60, 90 of 100.
Work fast! Make 30, 40, 50, 60, 90 or 100.

$49 - 21 = \underline{28}$

49 is dieselfde as 40 en 9. 49 is the same as 40 and 9.		
Kom ons trek nou 21 af. Now let's subtract 21.		

tiene tens	ene ones
4	9
- 2	1
2	8

9 ene neem weg 1 een gee 8 ene.
4 tiene neem weg 2 tiene gee 2 tiene.
2 tiene en 8 ene is 28.

9 ones take away 1 one leaves 8 ones.
4 tens take away 2 tens leaves 2 tens.
2 tens and 8 ones makes 28.

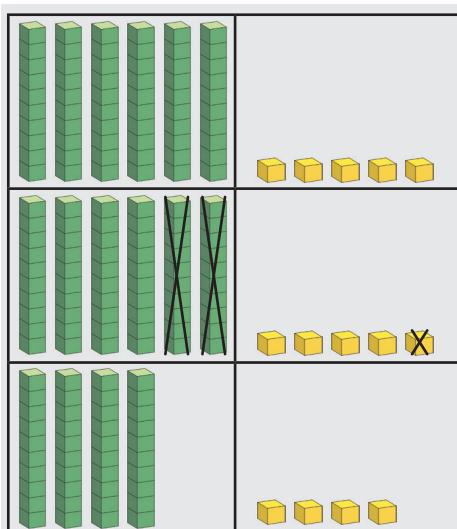

I Trek af met blokkies.

Subtract using blocks.

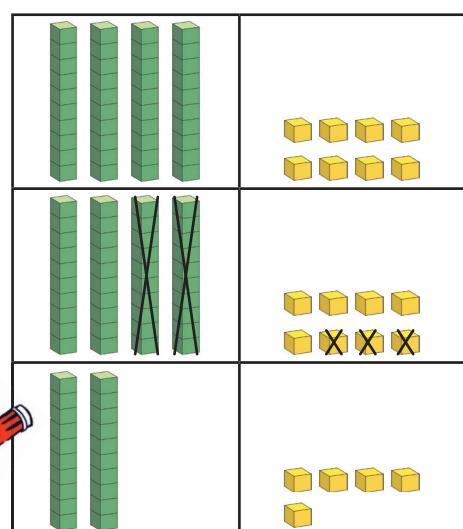

$58 - 16 = \underline{42}$	$49 - 23 = \underline{\quad}$	$68 - 37 = \underline{\quad}$
$36 - 13 = \underline{\quad}$	$74 - 21 = \underline{\quad}$	$94 - 42 = \underline{\quad}$
$84 - 12 = \underline{\quad}$	$38 - 17 = \underline{\quad}$	$36 - 15 = \underline{\quad}$

2 Trek af.

Subtract.
