Leerderaktiwiteitsboek

Learner Activity Book

Afrikaans | English

Die ontwikkeling van hierdie werkboek is met die medewerking van die *Bala Wande-Magic Classroom Collective*-span moontlik gemaak, in oorleg met 'n verwysingsspan wat saamgestel is uit individue van etlike universiteite, wiskunde-NRO's en die Departement van Basiese Onderwys.

Hierdie materiaal is gebaseer op die werk van die DBO-werkboeke en bestaande iterasies van lesplanne (GPLMS, Jika iMfundu, NECT en TMU).

Die Bala Wande-bokse met manipuleerbare items is in oorleg met Jade Education ontwerp. Dié bokse voorsien hoëgehalte-materiaal wat 'n integrerende deel van die onderrig-en-leerprogram uitmaak.

The development of this workbook was carried out by the collaborative *Bala Wande-Magic Classroom Collective team* in consultation with a reference team made up of individuals from several universities, mathematics NGOs and the Department of Basic Education. These materials draw on the DBE workbooks and existing iterations of lesson plans (GPLMS, Jika iMfundu, NECT and TMU). The Bala Wande manipulative boxes were designed in consultation with Jade Education. The boxes provide high quality materials which are an integral part of the teaching and learning programme.

## Die gebruik van die Bala Wande-leerderaktiwiteitsboek

In hierdie Leerderaktiwiteitsboek word aktiwiteite vir 50 dae van onderrig in kwartaal 2 vervat. Daar is konsepontwikkeling-aktiwiteite, individuele leerdersaktiwiteite en speletjies wat die leerders in pare en groepe kan speel. Die oplossings vir die aktiwiteite kan in hierdie boek ingeskryf word.

Die materiaal word in 'n tweetalige formaat aangebied. Ons hoop dat die aanbieding van die aktiwiteite in twee tale die leerders sal help om vertroud te raak met wiskundewoorde in hul huistaal en in Engels. Dit sal hulle vir die lewenslange leer van wiskunde toerus.

As die leerders elke dag en elke kwartaal stelselmatig deur hierdie werkboek-aktiwiteite werk, sal hulle die hele wiskundekurrikulum vir die jaar dek. Ons hoop dat hierdie aktiwiteite 'n prettige manier is om hulle te help om grondslagkennis van wiskunde op te doen.

Die aanvang van elke nuwe dag word met 'n rooi banier aangedui.

Onder die banier is daar 'n vloeidiagram wat die opeenvolging van aktiwiteite vir die dag opsom.

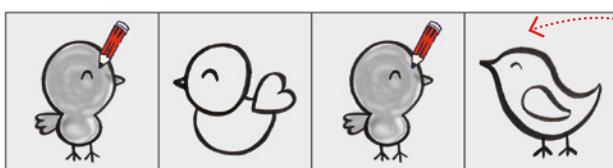

Hoofrekene is die eerste aktiwiteit van elke dag. Die onderwyser begelei die leerders deur hierdie aktiwiteit. Jy kan die speletjie op enige dag van die week speel.

Hierdie ikoon dui die konsepontwikkeling-aktiwiteit aan waarin die onderwyser die leiding neem.

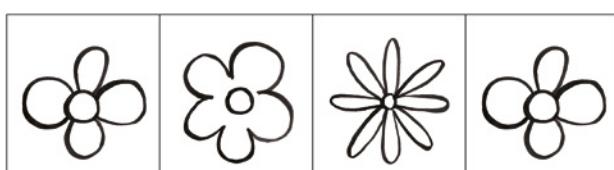

Al die ander bladsye in die boek is vir die leerders wat selfstandig of in groepe, met die onderwyser se begeleiding en ondersteuning, daarop moet werk. Dit kan die vorm van werkkaarte of speletjies aanneem om die begrippe wat op daardie dag behandel is, vas te lê. Speletjies word met behulp van tekenprente van leerders aangebied om te wys hoe die speletjie gespeel moet word.

1 Kleur twee prentjies in wat dieselfde is.  
Colour two pictures that are the same.

Alle instruksies en inligting word in Afrikaans gegee, met die Engelse vertaling daar onder.

Die leerderswerkkaarte bevat 'n uitgewerkte voorbeeld (deur die grys agtergrond en rooi potlood aangedui).

Dag 5 van elke week word vir vaslegging en assessering beplan.

## Using the Bala Wande Learner Activity Book

This Learner Activity Book has activities planned for 50 days of teaching in Term 2. There are concept development activities, individual learner activities and games for learners to play in pairs and groups. Answers to the activities can be written in this book.

The material is presented using a bilingual format. We hope that presenting the activities in two languages will help learners to become familiar with maths words in both their home language and in English. This will equip them for lifelong learning of maths.

If learners work systematically through these workbook-style activities every day and every term, they will cover the whole maths curriculum for the year. We hope that these activities will be a fun way to help them acquire foundational maths knowledge.

The start of each new day is shown with a red banner.

Underneath the banner is a flow diagram that summarises the sequence of activities for the day.

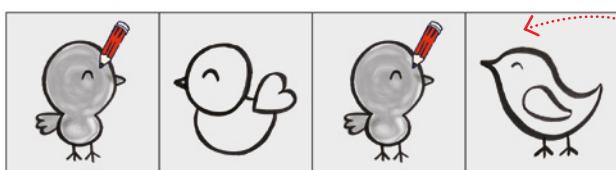

Mental Maths is the first activity every day. The teacher will lead this activity. You can play the game any day of the week.

This icon marks the concept development activity that the teacher will lead.

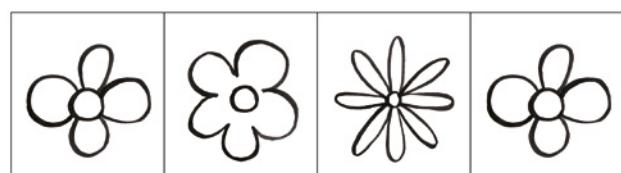

All the other pages in the book are for learners to work on independently or in groups with guidance and support from the teacher. They may be worksheets or games that will consolidate the concepts covered that day. Games are presented using cartoons of learners to show how the game should be played.

1 Kleur twee prentjies in wat dieselfde is.  
Colour two pictures that are the same.

All instructions and information are given in Afrikaans with an English translation below.

Learner worksheets have a worked example (indicated by the grey background and the red pencil).

Day 5 of each week is planned for consolidation and assessment.

## Speletjie: Jaag mekaar vorentoe en agtertoe oor die rivier

Game: Chasing forwards and backwards across the river

Maak beurte om die dobbelsteen te goo. As jy 4, 5 of 6 goo, kan jy soveel stappe aanskui. As jy 1, 2 of 3 goo, moet jy soveel stappe terugskuif. As die getal wat op die dobbelsteen gewys word, jou by 0 laat verbyskuif, kan jy nie skuif nie en jy slaan dan 'n beurt oor.

Take turns to throw the dice. If you throw 4, 5 or 6 you go forward that many steps. If you throw 1, 2 or 3 you go back that many steps. If the number shown on the dice takes you back past 0 you don't move and you miss a turn.

Ek het 2 gegooi;  
ek kan nie beweeg nie!  
I got 2 so I can't move!

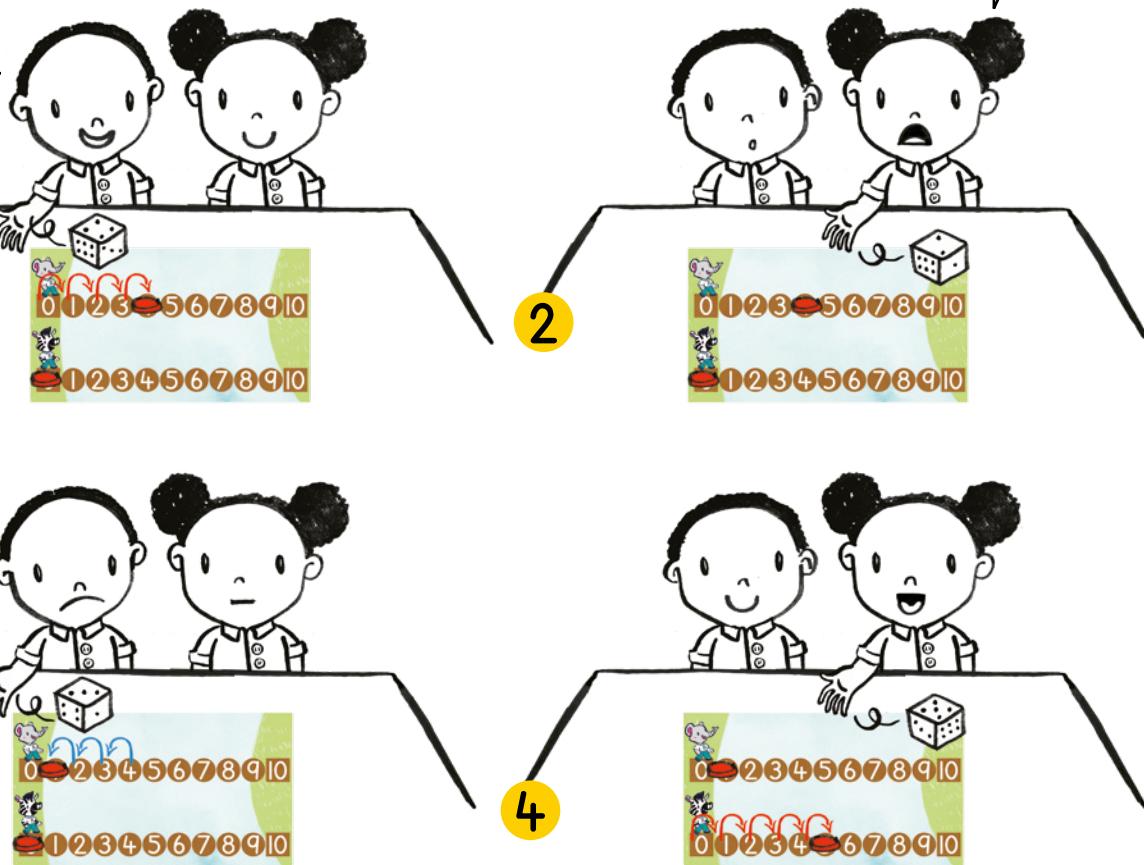

Ek het 4!  
I got 4!

1

2

3

### Speletjie: Bedek die trapklippe

Game: Cover the stepping stones

Gooi 2 dobbelstene. Besluit of julle wil optel of aftrek en sit dan 'n blokkie op die traplip met daardie antwoord. 6 is 'n gelukkige getal – as julle 'n 6 gooи, kan julle op enige getal van julle keuse gaan staan.

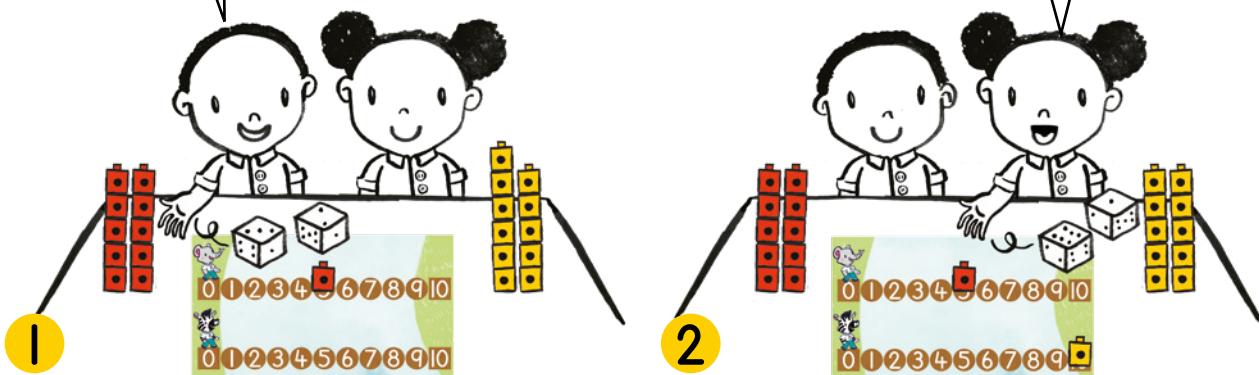

Roll 2 dice. Decide whether you want to add or subtract and then put a block on the stepping stone with that answer. 6 is a lucky number – if you roll a 6 you can make it any number you want.

**Ek gaan optel. 3 plus 2 is gelyk aan 5.**

I am going to add.  
3 plus 2 equals 5.

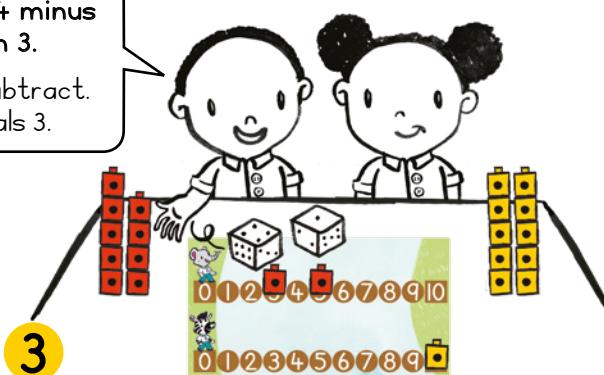

Hoera! Ek het die gelukkige nommer 6 gegooи. Ek gaan dit 9 maak en dan optel.  
9 plus 1 is gelyk aan 10.

Yay! I got the lucky number 6.  
I am going to make it 9 and add. 9 plus 1 equals 10.

**Ek gaan aftrek. 4 minus 1 is gelyk aan 3.**

I am going to subtract.  
4 minus 1 equals 3.

Die eerste leerder wat al hulle klippe kan bedek, is die wenner.

The first person to cover all their stones is the winner.

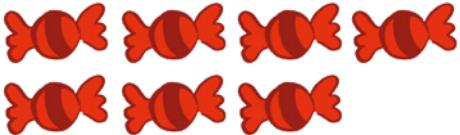

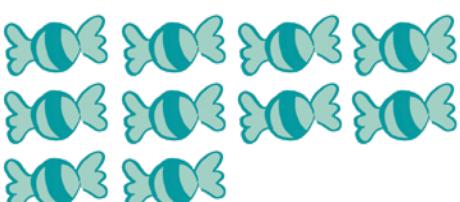

# 1 Vul die ontbrekende getalle in.

Fill in the missing numbers.

$5 - 3 = \underline{\quad}$	$2 + 3 = \underline{\quad}$	$2 + \underline{\quad} = 5$	$4 + 2 = \underline{\quad}$
$6 - 4 = \underline{\quad}$	$\underline{\quad} + 3 = 5$	$4 + 3 = \underline{\quad}$	$7 - 4 = \underline{\quad}$
$5 - 2 = \underline{\quad}$	$4 + \underline{\quad} = 7$	$7 - 3 = \underline{\quad}$	$2 + 8 = \underline{\quad}$
$4 + \underline{\quad} = 8$	$\underline{\quad} + 4 = 8$	$9 - 3 = \underline{\quad}$	$5 + 0 = \underline{\quad}$

# 2 Skryf die getalsin en los die probleem op.

Write the number sentence and solve the problem.

Ek het 8 lekkers. I have 8 sweets. 	Ek eet 8 lekkers. Hoeveel lekkers bly oor? I eat 8 sweets. How many are left? 	 $8 - 8 = \underline{\quad}$
Ek het 7 lekkers. I have 7 sweets. 	My ouma gee my 3 lekkers meer. Hoeveel lekkers het ek? My granny gives me 3 more sweets. How many do I have?	$\underline{\quad} + \underline{\quad} = \underline{\quad}$
Ek het 10 lekkers. I have 10 sweets. 	My suster het 3 lekkers minder as ek. Hoeveel lekkers het my suster? My sister has 3 less sweets than me. How many does my sister have?	$\underline{\quad} - \underline{\quad} = \underline{\quad}$
Ek het 7 lekkers. I have 7 sweets. 	My broer het 2 lekkers meer as ek. Hoeveel lekkers het my broer? My brother has 2 more sweets than me. How many does my brother have?	$\underline{\quad} + \underline{\quad} = \underline{\quad}$

The tissue box will slide.

**Die potlood gaan rol.**

The pencil will roll.

**1**

**2**

**3**

Die spelers hou aan om voorwerpe op te noem wat kan gly of kan rol. Die speletjie is verby sodra een speler nie meer aan enige voorwerpe kan dink nie. Die leerders kan dit in verskillende pare of groepe speel.

Players carry on naming things that slide or roll. The game is over when one player can't think of any more objects. Learners can play in different pairs or groups.

### 3 Kan die voorwerpe rol of gly? Merk die korrekte antwoord.

Can the objects roll or slide? Tick the correct block.

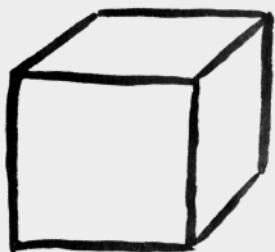

Dit rol. It rolls.	Dit gly. It slides.
Dit rol. It rolls.	Dit gly. It slides.
Dit rol. It rolls.	Dit gly. It slides.

**Vlakke van 3D voorwerpe**
