Leerderaktiwiteitsboek

Learner Activity Book

Afrikaans | English

Die ontwikkeling van hierdie werkboek is met die medewerking van die *Bala Wande-Magic Classroom Collective*-span moontlik gemaak, in oorleg met 'n verwysingsspan wat saamgestel is uit individue van etlike universiteite, wiskunde-NRO's en die Departement van Basiese Onderwys.

Hierdie materiaal is gebaseer op die werk van die DBO-werkboeke en bestaande iterasies van lesplanne (GPLMS, Jika iMfundu, NECT en TMU).

Die Bala Wande-bokse met manipuleerbare items is in oorleg met Jade Education ontwerp. Dié bokse voorsien hoëgehalte-materiaal wat 'n integrerende deel van die onderrig-en-leerprogram uitmaak.

The development of this workbook was carried out by the collaborative *Bala Wande-Magic Classroom Collective team* in consultation with a reference team made up of individuals from several universities, mathematics NGOs and the Department of Basic Education. These materials draw on the DBE workbooks and existing iterations of lesson plans (GPLMS, Jika iMfundu, NECT and TMU). The Bala Wande manipulative boxes were designed in consultation with Jade Education. The boxes provide high quality materials which are an integral part of the teaching and learning programme.

## Die gebruik van die Bala Wande-leerderaktiwiteitsboek

In hierdie Leerderaktiwiteitsboek word aktiwiteite vir 50 dae van onderrig in kwartaal 3 vervat. Daar is konsepontwikkeling-aktiwiteite, individuele leerdersaktiwiteite en speletjies wat die leerders in pare en groepe kan speel. Die oplossings vir die aktiwiteite kan in hierdie boek ingeskryf word.

Die materiaal word in 'n tweetalige formaat aangebied. Ons hoop dat die aanbieding van die aktiwiteite in twee tale die leerders sal help om vertroud te raak met wiskundewoorde in hul huistaal en in Engels. Dit sal hulle vir die lewenslange leer van wiskunde toerus.

As die leerders elke dag en elke kwartaal stelselmatig deur hierdie werkboek-aktiwiteite werk, sal hulle die hele wiskundekurrikulum vir die jaar dek. Ons hoop dat hierdie aktiwiteite 'n prettige manier is om hulle te help om grondslagkennis van wiskunde op te doen.

Die aanvang van elke nuwe dag word met 'n rooi banier aangedui.

Onder die banier is daar 'n vloeidiagram wat die opeenvolging van aktiwiteite vir die dag opsom.

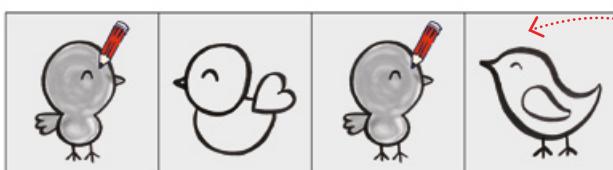

Hoofrekene is die eerste aktiwiteit van elke dag. Die onderwyser begelei die leerders deur hierdie aktiwiteit. Jy kan die speletjie op enige dag van die week speel.

Hierdie ikoon dui die konsepontwikkeling-aktiwiteit aan waarin die onderwyser die leiding neem.

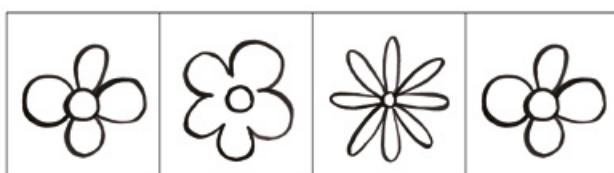

Al die ander bladsye in die boek is vir die leerders wat selfstandig of in groepe, met die onderwyser se begeleiding en ondersteuning, daaraan moet werk. Dit kan die vorm van werkkaarte of speletjies aanneem om die begrippe wat op daardie dag behandel is, vas te lê. Speletjies word met behulp van tekenprente van leerders aangebied om te wys hoe die speletjie gespeel moet word.

1 Kleur twee prentjies in wat dieselfde is.  
Colour two pictures that are the same.

Alle instruksies en inligting word in Afrikaans gegee, met die Engelse vertaling daar onder.

Die leerderswerkkaarte bevat 'n uitgewerkte voorbeeld (deur die grys agtergrond en rooi potlood aangedui).

Dag 5 van elke week word vir vaslegging en assessering beplan.

## Using the Bala Wande Learner Activity Book

This Learner Activity Book has activities planned for 50 days of teaching in Term 3. There are concept development activities, individual learner activities and games for learners to play in pairs and groups. Answers to the activities can be written in this book.

The material is presented using a bilingual format. We hope that presenting the activities in two languages will help learners to become familiar with maths words in both their home language and in English. This will equip them for lifelong learning of maths.

If learners work systematically through these workbook-style activities every day and every term, they will cover the whole maths curriculum for the year. We hope that these activities will be a fun way to help them acquire foundational maths knowledge.

The start of each new day is shown with a red banner.

Underneath the banner is a flow diagram that summarises the sequence of activities for the day.

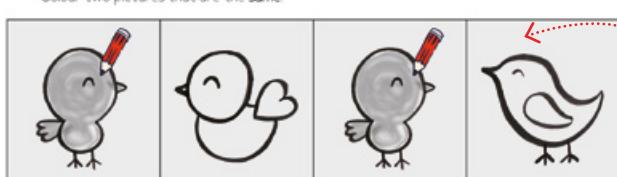

Mental Maths is the first activity every day. The teacher will lead this activity. You can play the game any day of the week.

This icon marks the concept development activity that the teacher will lead.

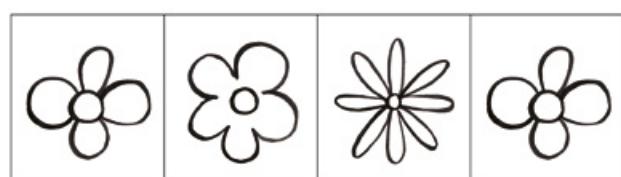

All the other pages in the book are for learners to work on independently or in groups with guidance and support from the teacher. They may be worksheets or games that will consolidate the concepts covered that day. Games are presented using cartoons of learners to show how the game should be played.

1 Kleur twee prentjies in wat dieselfde is.  
Colour two pictures that are the same.

All instructions and information are given in Afrikaans with an English translation below.

Learner worksheets have a worked example (indicated by the grey background and the red pencil).

Day 5 of each week is planned for consolidation and assessment.

GAMEKONSEPONTWIKKELING  
CONCEPT DEVELOPMENTWERKKAART  
WORKSHEET**Speletjie: 1, 2, 3 Wys – optelling**

Game: 1, 2, 3 Show – addition

Speel met die getalkaarte 0 tot 5. Skommel julle kaarte en sit dit met die gesig na onder op die skoolbank neer.

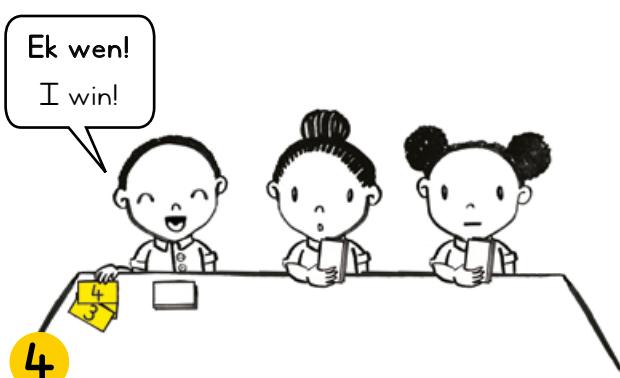

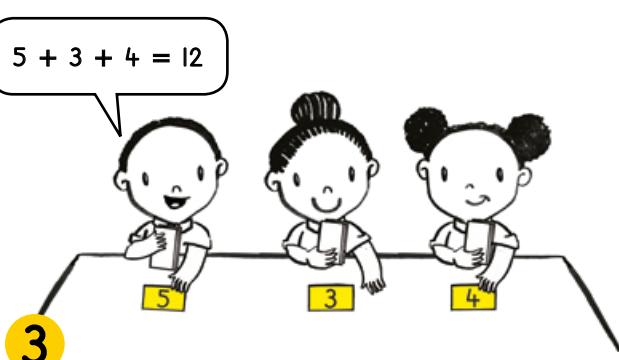

Play with the number cards 0–5. Shuffle your cards and put them face down on the desk.

I, 2, 3 Wys!  
I, 2, 3 Show!

Die eerste leerders wat die getalle bymekaartel en die antwoord uitroep, hou die kaarte.

The first person to add the numbers and call out the answer keeps the cards.

Kom ons speel weer.  
I, 2, 3 Wys!

Let's play again.  
I, 2, 3 Show!

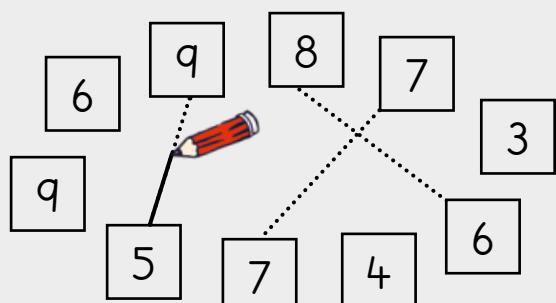

Die leerder met die meeste kaarte aan die einde is die wenner van die speletjie.

The learner with the most cards at the end wins the game.

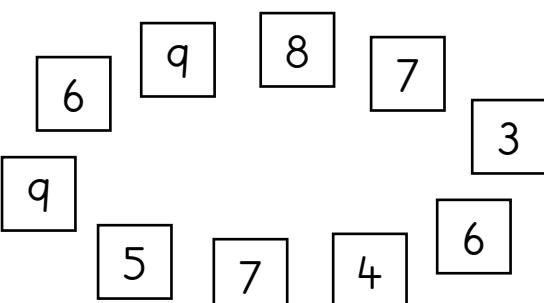

**1** Verbind 2 getalle om die antwoord in die linkerhoek te kry.

Join 2 numbers to get the answer in the left corner.

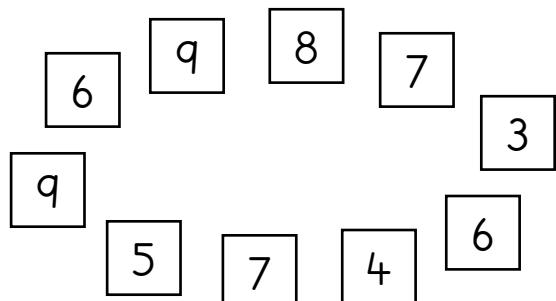

14

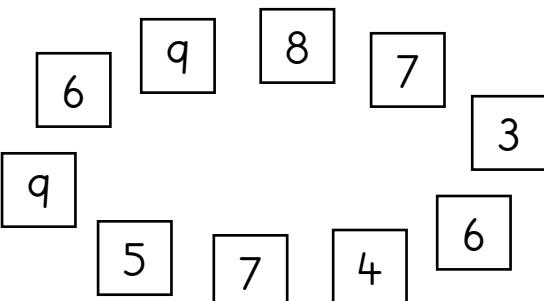

15

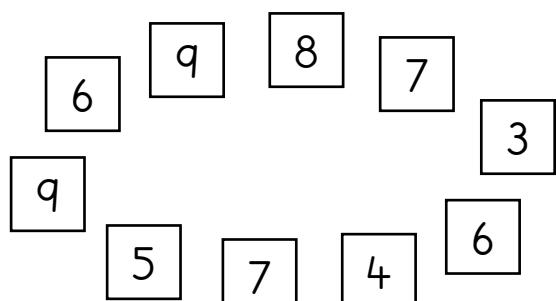

16

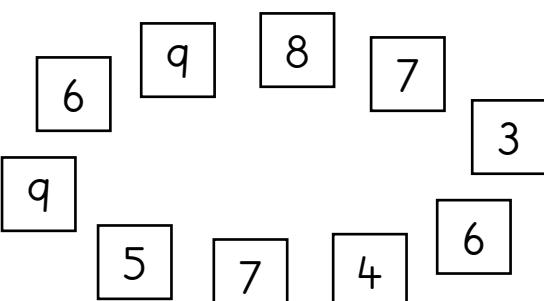

12

13

18

**2** Los die probleem op en kleur dan die antwoord aan die onderkant in.

Solve the problem and then colour the answer on the bottom line.

$7 + 4 = \underline{11}$

$6 + 6 = \underline{12}$

$8 + 6 = \underline{\quad}$

$7 + 8 = \underline{\quad}$

$9 + 8 = \underline{\quad}$

$9 + 9 = \underline{\quad}$

$8 + 8 = \underline{\quad}$

$8 + \underline{\quad} = 17$

$7 + 6 = \underline{\quad}$

$5 + \underline{\quad} = 13$

$3 + 7 = \underline{\quad}$

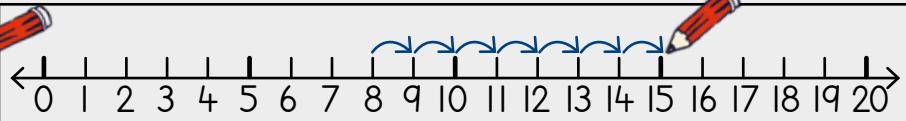

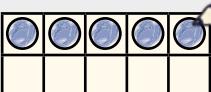

$7 + \underline{\quad} = 14$

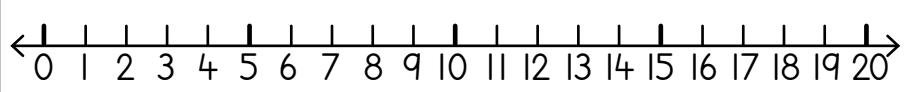

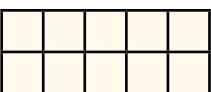

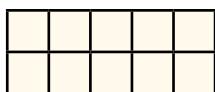

7	8	9	10	11	12	13	14	15	16	17	18

## 1 Los op en kleur in om die patroon te kry.

Solve and colour to find the pattern.

$$q + q = \underline{18}$$

$$5 + 5 = \underline{10}$$

$$4 + 4 = \underline{\quad}$$

$$4 + 5 = \underline{\quad}$$

$$7 + 7 = \underline{\quad}$$

$$5 + 6 = \underline{\quad}$$

$$6 + 6 = \underline{\quad}$$

$$8 + 8 = \underline{\quad}$$

$$q + 8 = \underline{\quad}$$

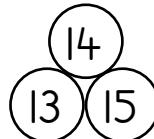

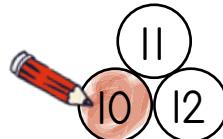

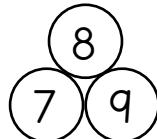

$$3 + 4 = \underline{\quad}$$

$$8 + 7 = \underline{\quad}$$

$$7 + 6 = \underline{\quad}$$

## 2 Los op en kleur in om die patroon te kry.

Solve and colour to find the pattern.

$$11 - 3 = \underline{8}$$

$$13 - 4 = \underline{9}$$

$$q + 3 = \underline{12}$$

$$11 - 6 = \underline{\quad}$$

$$11 - 9 = \underline{\quad}$$

$$8 + 5 = \underline{\quad}$$

$$11 - 8 = \underline{\quad}$$

$$14 - 7 = \underline{\quad}$$

$$7 + 9 = \underline{\quad}$$

$$12 - 6 = \underline{\quad}$$

$$15 - 5 = \underline{\quad}$$

$$7 + 8 = \underline{\quad}$$

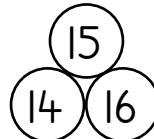

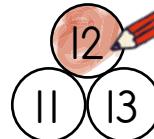

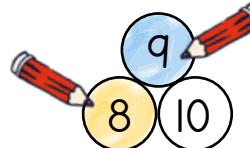

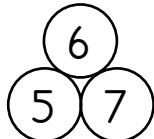

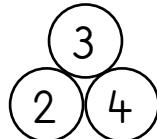

$$12 - 8 = \underline{\quad}$$

$$20 - 9 = \underline{\quad}$$

$$6 + 8 = \underline{\quad}$$

## Speletjie: Maak die druwekorrels toe

Game: Cover the grapes

Gooi die dobbelstene en tel op. Kry die druwekorrel met jou antwoord daarop.  
Jy kan daardie korrel toemaak.

Roll the dice and add. Find a grape with the answer you got. You can cover that grape.

1

Ek kan 'n korrel toemaak!

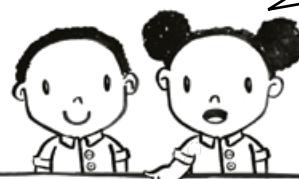

$$4 + 2 = 6$$

I can cover a grape!

2

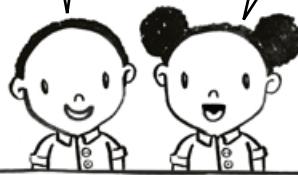

Nee wat!  
Jou beurt.  
 $5 + 6 = 11$   
No good!  
Your turn.

3

Ná nog 'n paar gooie:

After a few more turns:

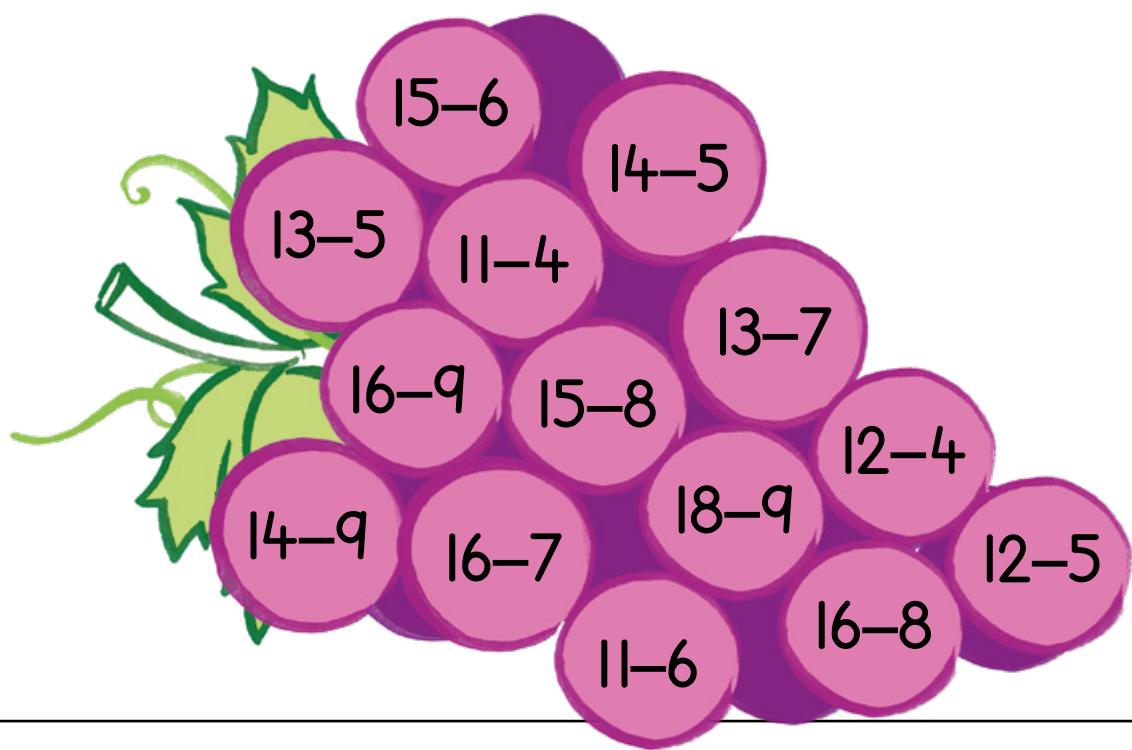

Jy wen!  
You win!

Ek het 9 gekry, en jy 5.  
I got 9 and you got 5.

4

Die leerder wat die meeste korrels op die bord toemaak, is die wenner.

The person who covers the most grapes on the board wins.

Hou aan speel totdat al die kaarte op is. Die speler wat die meeste kaarte gekry het, is die wenner.

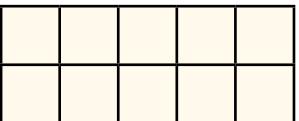

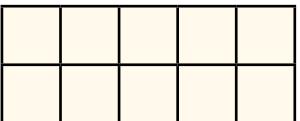

Keep going until all the cards are used. The player who kept the most cards wins.

**I** Skryf die getal in wat voor en ná die gegewe getal staan.

Write the number that comes before and after.

**2** Kry die ontbrekende getal.

Find the missing number.

WORKSHEET

**1** Los die woordprobleme met behulp van die tienrame op.

Solve the word problems using the ten frames.

Daar is 17 appels.  
8 word opgeëet.  
Hoeveel appels bly oor?

There are 17 apples. 8 are eaten.  
How many apples are left?

$$\underline{\quad} - \underline{\quad} = \underline{\quad}$$

Daar is 15 ballonne.  
8 ballonne sweef weg.  
Hoeveel ballonne bly oor?

There are 15 balloons. 8 float away.  
How many balloons are left?

$$\underline{\quad} - \underline{\quad} = \underline{\quad}$$

Daar is 14 blomme.  
7 blomme word weggegee.  
Hoeveel blomme bly oor?

There are 14 flowers. 7 are given away.  
How many flowers are left?

$$\underline{\quad} - \underline{\quad} = \underline{\quad}$$

**2** Vul die getalkombinasietabelle in om die boonste getal te maak.

Fill the bond tables to make the top number.

### 3 Voltooi om die boonste getal te kry.

Complete to match the number at the top.

House 1 (Top Number: 11)

 $3 + \underline{\quad}$   
 $2 + \underline{\quad}$   
 $4 + \underline{\quad}$   
 $\underline{\quad} + 1$   
 $\underline{\quad} + 6$   
 $\underline{\quad} + 4$ 

House 2 (Top Number: 16)

 $4 + \underline{\quad}$   
 $5 + \underline{\quad}$   
 $3 + \underline{\quad}$   
 $\underline{\quad} + 7$   
 $\underline{\quad} + 8$   
 $\underline{\quad} + 9$ 

House 3 (Top Number: 13)

 $5 + \underline{\quad}$   
 $6 + \underline{\quad}$   
 $7 + \underline{\quad}$   
 $\underline{\quad} + 8$   
 $\underline{\quad} + 9$   
 $\underline{\quad} + 4$ 

### 4 Hoeveel kraale bly oor as ek       wegneem?

How many beads are left if I take away      ?

 $18 - \underline{\quad} = \underline{\quad}$	 $\underline{\quad} - \underline{\quad} = \underline{\quad}$
 $\underline{\quad} - \underline{\quad} = \underline{\quad}$	 $\underline{\quad} - \underline{\quad} = \underline{\quad}$
 $\underline{\quad} - \underline{\quad} = \underline{\quad}$	 $\underline{\quad} - \underline{\quad} = \underline{\quad}$
