Leerderaktiwiteitsboek

Learner Activity Book

Afrikaans | English

Die ontwikkeling van hierdie werkboek is met die medewerking van die *Bala Wande-Magic Classroom Collective*-span moontlik gemaak, in oorleg met 'n verwysingsspan wat saamgestel is uit individue van etlike universiteite, wiskunde-NRO's en die Departement van Basiese Onderwys.

Hierdie materiaal is gebaseer op die werk van die DBO-werkboeke en bestaande iterasies van lesplanne (GPLMS, Jika iMfundu, NECT en TMU).

Die Bala Wande-bokse met manipuleerbare items is in oorleg met Jade Education ontwerp. Dié bokse voorsien hoëgehalte-materiaal wat 'n integrerende deel van die onderrig-en-leerprogram uitmaak.

The development of this workbook was carried out by the collaborative *Bala Wande-Magic Classroom Collective team* in consultation with a reference team made up of individuals from several universities, mathematics NGOs and the Department of Basic Education. These materials draw on the DBE workbooks and existing iterations of lesson plans (GPLMS, Jika iMfundu, NECT and TMU). The Bala Wande manipulative boxes were designed in consultation with Jade Education. The boxes provide high quality materials which are an integral part of the teaching and learning programme.

Die gebruik van die Bala Wande-leerderaktiwiteitsboek

In hierdie Leerderaktiwiteitsboek word aktiwiteite vir 40 dae van onderrig in kwartaal 4 vervat. Daar is konsepontwikkeling-aktiwiteite, individuele leerdersaktiwiteite en speletjies wat die leerders in pare en groepe kan speel. Die oplossings vir die aktiwiteite kan in hierdie boek ingeskryf word.

Die materiaal word in 'n tweetalige formaat aangebied. Ons hoop dat die aanbieding van die aktiwiteite in twee tale die leerders sal help om vertroud te raak met wiskundewoorde in hul huistaal en in Engels. Dit sal hulle vir die lewenslange leer van wiskunde toerus.

As die leerders elke dag en elke kwartaal stelselmatig deur hierdie werkboek-aktiwiteite werk, sal hulle die hele wiskundekurrikulum vir die jaar dek. Ons hoop dat hierdie aktiwiteite 'n prettige manier is om hulle te help om grondslagkennis van wiskunde op te doen.

Die aanvang van elke nuwe dag word met 'n rooi banier aangedui.

Onder die banier is daar 'n vloeidiagram wat die opeenvolging van aktiwiteite vir die dag opsom.

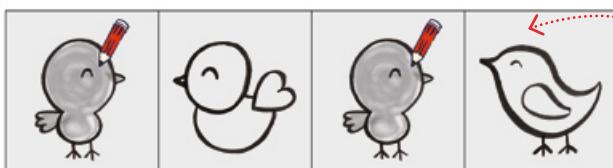

Hoofrekene is die eerste aktiwiteit van elke dag. Die onderwyser begelei die leerders deur hierdie aktiwiteit. Jy kan die speletjie op enige dag van die week speel.

Hierdie ikoon dui die konsepontwikkeling-aktiwiteit aan waarin die onderwyser die leiding neem.

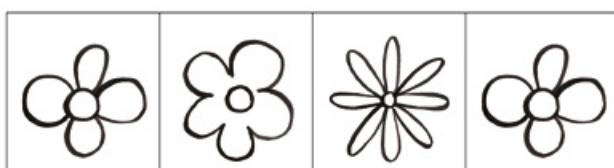

Al die ander bladsye in die boek is vir die leerders wat selfstandig of in groepe, met die onderwyser se begeleiding en ondersteuning, daarvan moet werk. Dit kan die vorm van werkkaarte of speletjies aanneem om die begrippe wat op daardie dag behandel is, vas te lê. Speletjies word met behulp van tekenprente van leerders aangebied om te wys hoe die speletjie gespeel moet word.

1 Kleur twee prentjies in wat dieselfde is.
Colour two pictures that are the same.

Alle instruksies en inligting word in Afrikaans gegee, met die Engelse vertaling daar onder.

Die leerderswerkkaarte bevat 'n uitgewerkte voorbeeld (deur die grys agtergrond en rooi potlood aangedui).

Dag 5 van elke week word vir vaslegging en assessering beplan.

Using the Bala Wande Learner Activity Book

This Learner Activity Book has activities planned for 40 days of teaching in Term 4. There are concept development activities, individual learner activities and games for learners to play in pairs and groups. Answers to the activities can be written in this book.

The material is presented using a bilingual format. We hope that presenting the activities in two languages will help learners to become familiar with maths words in both their home language and in English. This will equip them for lifelong learning of maths.

If learners work systematically through these workbook-style activities every day and every term, they will cover the whole maths curriculum for the year. We hope that these activities will be a fun way to help them acquire foundational maths knowledge.

The start of each new day is shown with a red banner.

Underneath the banner is a flow diagram that summarises the sequence of activities for the day.

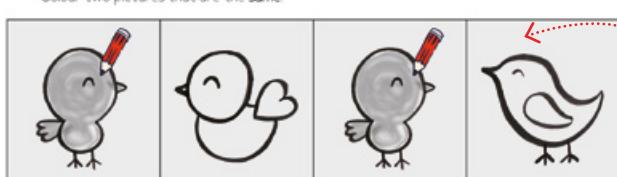

Mental Maths is the first activity every day. The teacher will lead this activity. You can play the game any day of the week.

This icon marks the concept development activity that the teacher will lead.

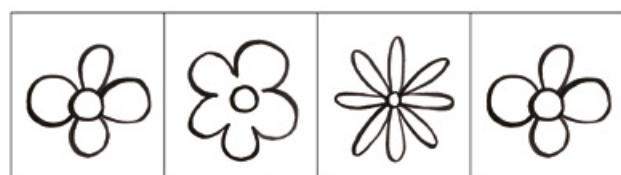

All the other pages in the book are for learners to work on independently or in groups with guidance and support from the teacher. They may be worksheets or games that will consolidate the concepts covered that day. Games are presented using cartoons of learners to show how the game should be played.

1 Kleur twee prentjies in wat dieselfde is.
Colour two pictures that are the same.

All instructions and information are given in Afrikaans with an English translation below.

Learner worksheets have a worked example (indicated by the grey background and the red pencil).

Day 5 of each week is planned for consolidation and assessment.

I Los die woordprobleme op.

Solve the word problems.

10 vierkante

10 squares

3 driehoekte

3 triangles

Hoeveel vorms is daar?

How many shapes are there?

13	
10	3

$$\underline{10} + \underline{3} = \underline{13}$$

Daar is 4 bye en 7 slakke in die tuin.

Hoeveel gediertes is daar in die tuin?

There are 4 bees and 7 snails in the garden.

How many creatures are there in the garden?

Daar is 6 slakke en 5 miere in die tuin.

Hoeveel gediertes is daar in die tuin?

There are 6 snails and 5 ants in the garden.

How many creatures are there in the garden?

Daar is 13 bye in die tuin.

7 bye vlieg weg. Hoeveel bye bly oor?

There are 13 bees in the garden. 7 fly away.

How many bees are left?

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

Daar is 16 slakke en 9 bye in die tuin.

Wat is die verskil tussen die aantal slakke en die aantal bye?

There are 16 snails and 9 bees in the garden.

What is the difference between the number of snails and the number of bees?

$$\underline{\quad} - \underline{\quad} = \underline{\quad}$$

Daar is 18 miere op die blaar.

9 miere gaan soek na kos.

Hoeveel miere bly oor op die blaar?

There are 18 ants on the leaf. 9 ants go to find food.

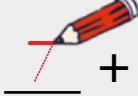

How many ants are left on the leaf?

$$\underline{\quad} - \underline{\quad} = \underline{\quad}$$

- 2** Vertel jou maat 'n optellingstorie oor die albasters. Skryf die getalsin.

Tell your partner an addition story about the marbles. Write the number sentence.

	Getalsin Number sentence
  Ek het 7 rooi albasters en 8 blou albasters. Hoeveel albasters het ek altesame? I have 7 red marbles and 8 blue marbles. How many marbles do I have altogether?	 $\underline{7} + \underline{8} = \underline{15}$
  	$\underline{\quad} + \underline{\quad} = \underline{\quad}$
  	$\underline{\quad} + \underline{\quad} = \underline{\quad}$
  	$\underline{\quad} + \underline{\quad} = \underline{\quad}$
  	$\underline{\quad} + \underline{\quad} = \underline{\quad}$

WORKSHEET**Speletjie: Kry my getal!**

Game: Make my number!

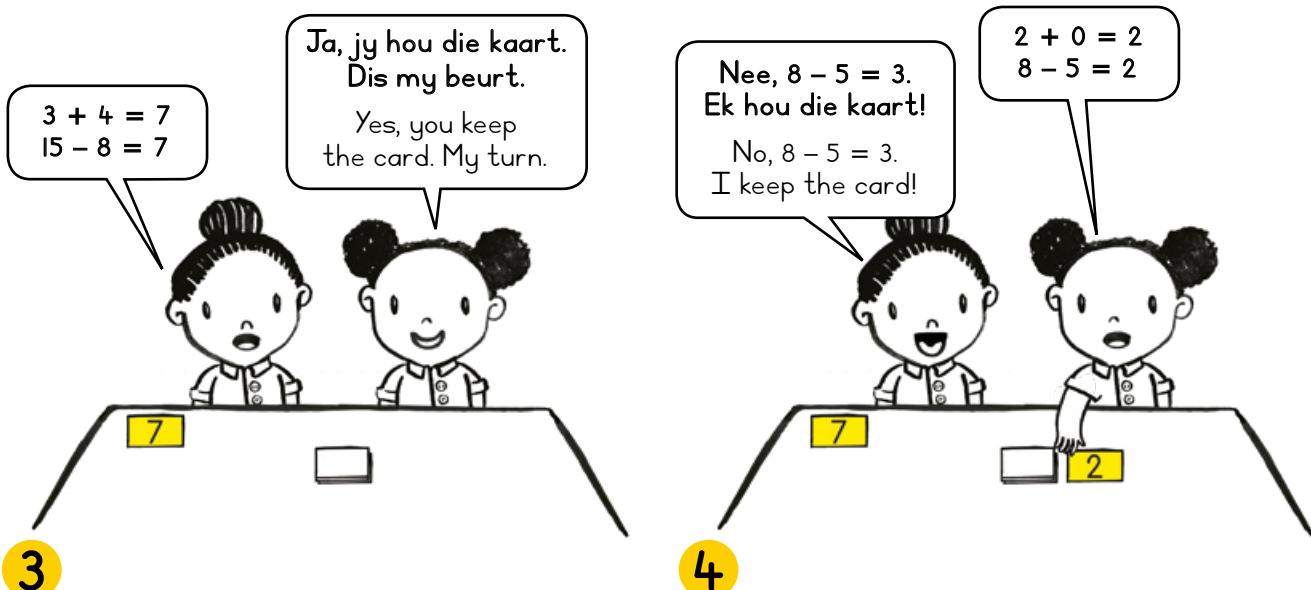

Speel met jou 0–10-getalkaarte.

Play with your 0–10 number cards.

Sodra jy 'n kaart optel, maak een optellingsin en een aftrekkingsin waarvan die antwoord die getal op jou kaart gee.

When you pick up a card, make one addition sentence and one subtraction sentence that equal the number shown on your card.

Hou aan speel totdat al die kaarte gebruik is. Die speler wat die meeste kaarte het, is die wenner.

Keep going until all the cards are used. The player who kept the most cards wins.

Los die woordprobleme op. Skryf die getalle op die getaltabel in.

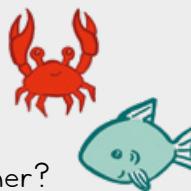

Solve the word problems. Write the numbers in the number table.

Daar is 11 krappe en 7 visse.

Hoeveel seediere
is daar altesame?

There are 11 crabs and 7 fish.

How many creatures are there altogether?

18	
11	7

 + = 18

Daar is 3 haaie en 9 visse.

Hoeveel is daar
altesame?

There are 3 sharks and 9 fish.

How many are there altogether?

 + =

Daar is 16 visse.

7 visse swem weg.

Hoeveel visse bly oor?

There are 16 fish. 7 fish swim away.

How many fish are left?

16	
7	9

 - = 9

Daar is 11 walvisse.

6 walvisse swem weg.

Hoeveel walvisse bly oor?

There are 11 whales. 6 swim away.

How many whales are left?

 - =

Daar is 14 blou visse en 7 oranje visse.

Wat is die verskil tussen die aantal blou visse

en die aantal oranje visse?

There are 14 blue fish and 7 orange fish.

What is the difference between the number of blue fish and the number of orange fish?

 - =

Lwandile het 20 skulpe.

Sy gee 10 skulpe vir haar maat.

Hoeveel skulpe bly oor?

Lwandile has 20 shells. She gives 10 shells to her friend. How many shells are left?

 - =

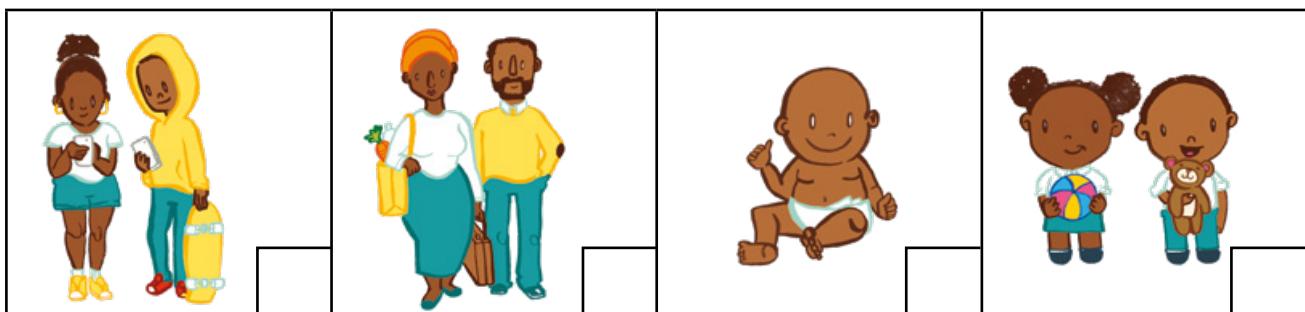

- I Gesels met jou maat oor dit wat in elke prent gebeur. Maak 'n regmerkie by die aktiwiteite wat langer duur en 'n kruisie by die aktiwiteite wat korter duur.

Talk to your friend about what is happening in each picture. Tick the activities that take a longer time and cross the activities that take a shorter time.

	<input checked="" type="checkbox"/> 
<p>Loop skool toe. Walking to school.</p>	<p>Ry skool toe. Driving to school.</p>
	
<p>Maak 'n toebroodjie. Making a sandwich.</p>	<p>Bak 'n koek. Making a cake.</p>
	
<p>Werk by die skool. Working at school.</p>	<p>Speel 'n speletjie of sokker. Playing a game of soccer.</p>
	
<p>Verf 'n huis. Painting a house.</p>	<p>Verf 'n prent. Painting a picture.</p>

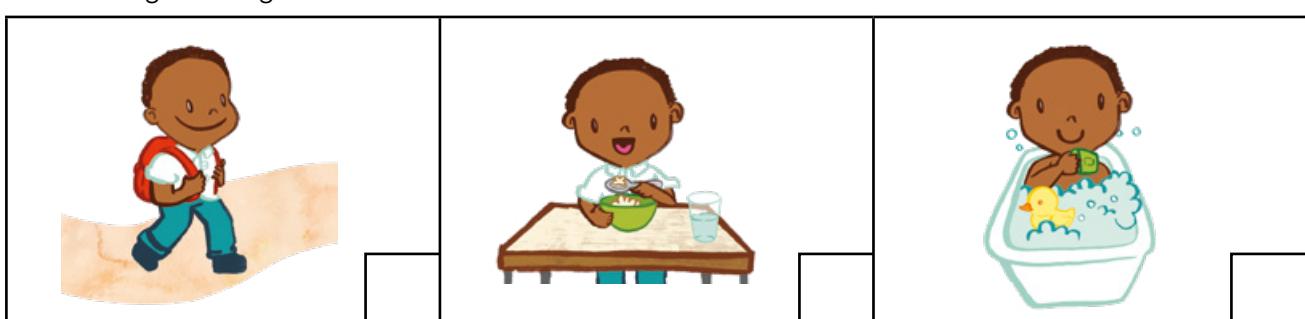

2 Skryf die getalle 1 tot 4 binne-in die boksies in om die volgorde te wys waarin 'n mens groei.

Write the numbers 1–4 in the blocks to show the order in which a person grows.

Maak 'n regmerkie by die een wat jy die vinnigste kan doen.

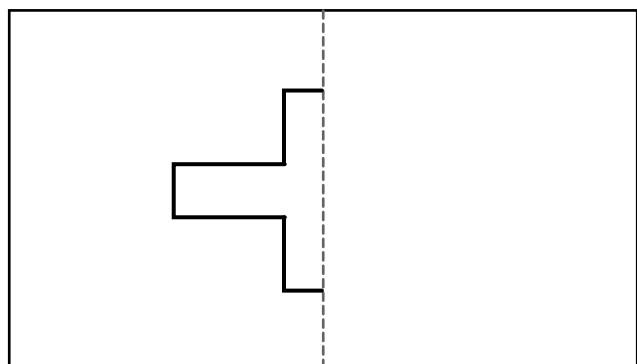

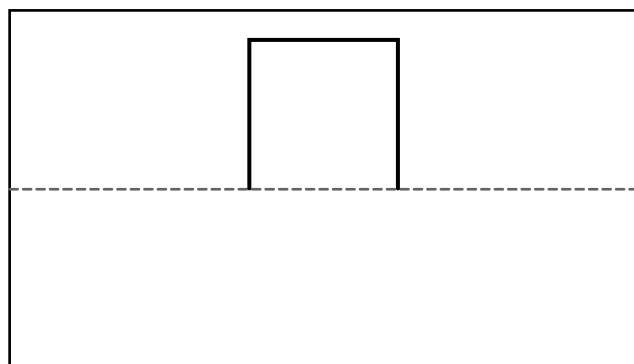

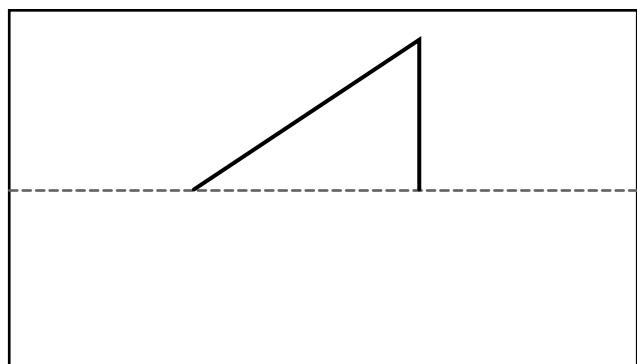

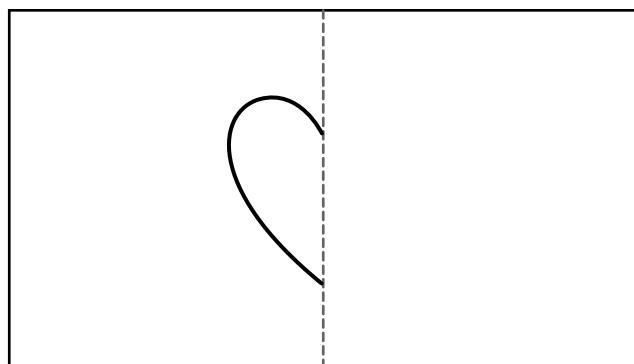

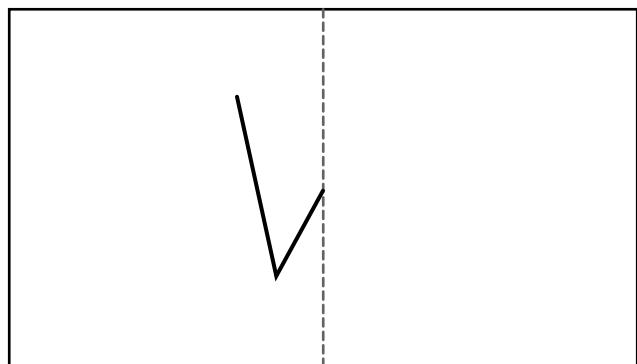

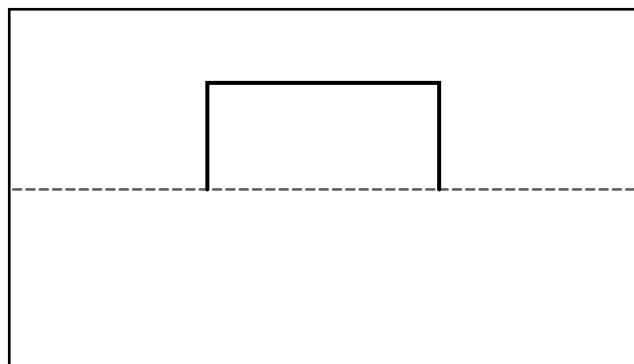

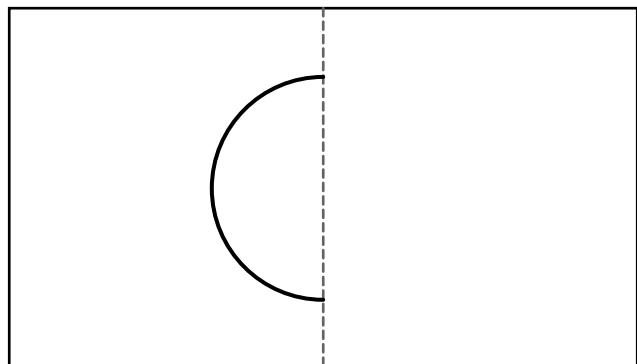

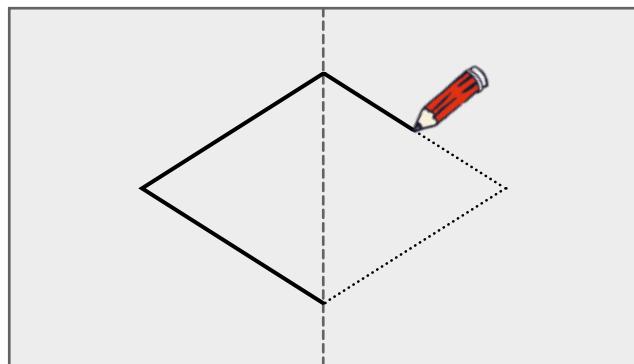

Tick to say which you would do fastest.

3 Los die woordprobleme op. Skryf die getalle op die getaltabel in.

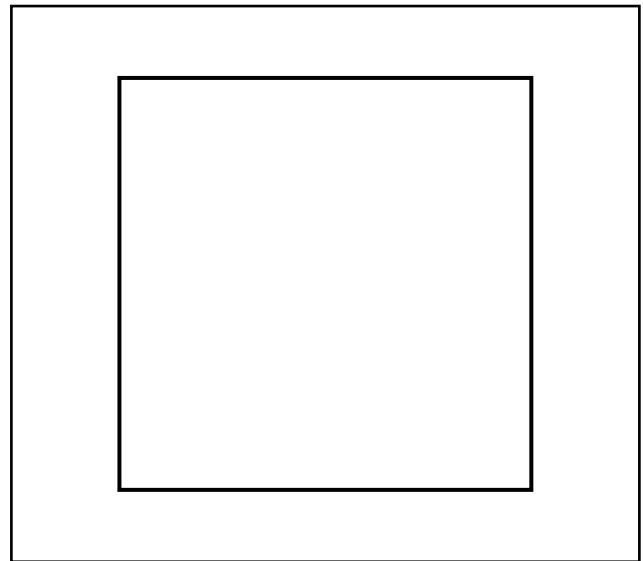

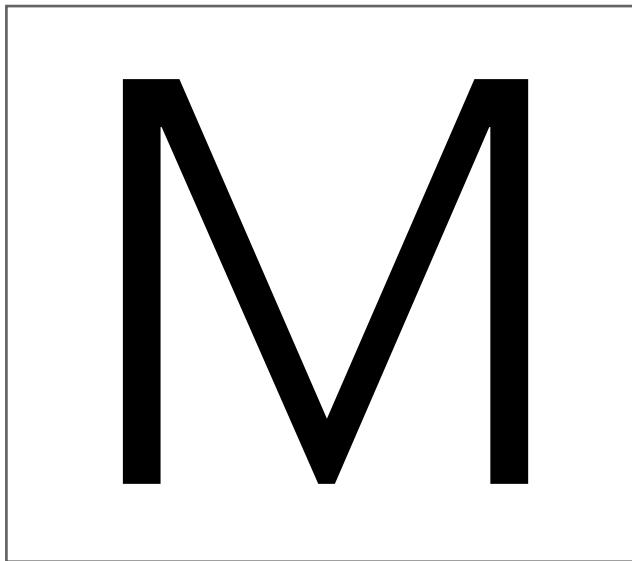

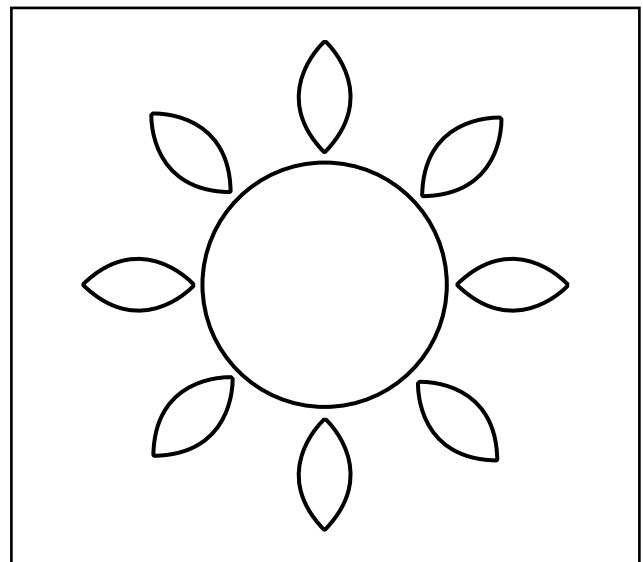

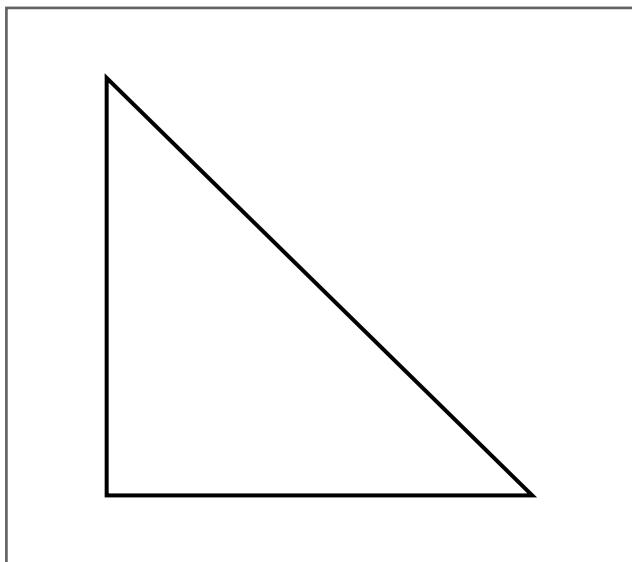

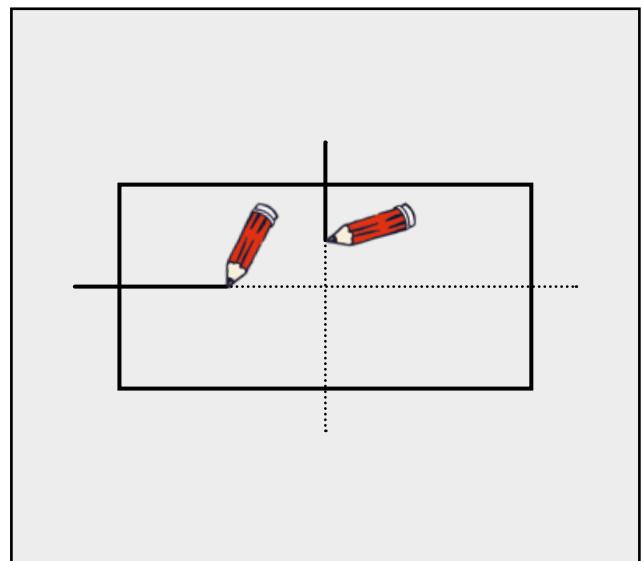

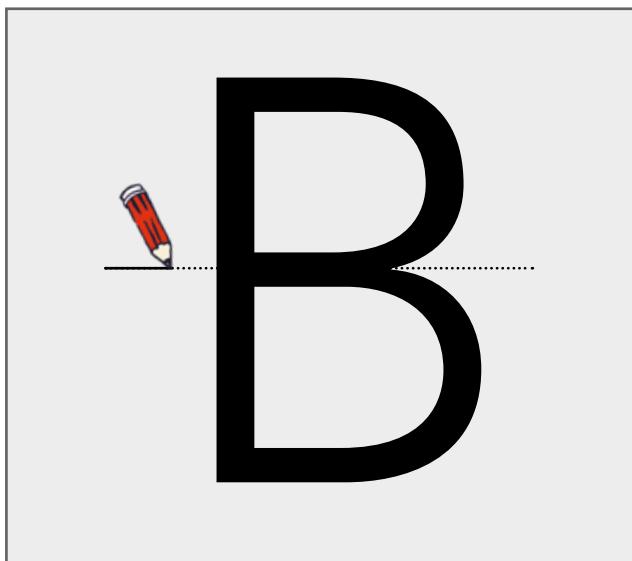

Solve the word problems. Write the numbers in the number table.
